GETTING STARTED

CHARGING THE BATTERY

The mr Handsfree Blue Twin headset comes with a rechargeable battery included. For first time use, it takes about 24 hours to fully charge the battery. Afterwards, it takes about 2 hours to fully charge the battery. When the battery is fully charged, the talk time is 7 hours, and the stand-by time will be about 200 hours. The best performance of the Blue Twin's battery is achieved by charging and discharging the unit completely for 3 times.

Plug the Travel Charger (7) into an AC outlet. → Connect the adapter (6) into the headset (5) as shown in the picture. Gently press the adapter until it **clicks** into place. → The red indicator (4) on the headset will light up. → When the battery is fully charged, the red indicator (4) on the headset will turn off and the purple indicator will turn on.

MAIN FUNCTIONS MULTIFUNCTIONAL AND VOLUME BUTTONS & LED INDICATOR

MF-Button (3):

→ Power on/off
→ Answer / end / transfer calls / redial
→ Pairing

Volume Button (2+8):

→ Adjust volume
→ Mute-function

LED indicator (4):

Headset action	Indicator
During pairing	Purple LED lights up constantly
Pairing successful	Red LED starts flashing every 4 seconds
Standby-mode	Red LED lights up every 4 seconds
Battery under charging	Red LED is turned on constantly
Battery charged	Red LED turns off and purple LED turns on

TURNING THE HEADSET ON/OFF

To turn the headset on:

Press and hold the MF- button (3) for 5 seconds. → You will hear 1 short tone and the purple indicator (4) of the headset flashes. → The headset is now turned on.

To turn the headset off:

Press and hold the MF-button (3) for 4 seconds. → You will hear 1 short tone and the purple indicator (4) of the headset lights 2 times shortly up. → The headset is now turned off.

PAIRING THE HEADSET

You are required to pair the Blue Twin headset with your mobile phone once before using it.
Each Blue Twin headset has a default PIN-code **0000** for pairing, which is stored in its internal memory. You are usually required to enter the PIN-code **0000** in a pairing process with a Bluetooth® mobile phone or other devices; however it depends on the kind of Bluetooth® device that the headset is connected to.

The Blue Twin headset must be turned off before initiating pairing. → Press and hold the MF-button (3) until the purple indicator (4) lights up constantly. → The headset is now ready for pairing. → Initiate the pairing process on your Bluetooth® mobile phone to pair with the Blue Twin headset. (Refer to the manual of your mobile phone.) → Select **Blue Twin** out of the list with found devices on your mobile phone. → You will be asked to enter the PIN-code to complete pairing, enter **0000** and confirm it. → When the pairing has been successful, the purple indicator (4) of the headset will flash every 4 seconds.

Note:

1. *If the Blue Twin headset is not in pairing mode, your mobile phone won't find the headset. Please set the headset into pairing mode before letting your mobile phone search for the headset.*
2. *If no pairing is possible for a period of time (approx. two minutes), the headset will automatically leave pairing mode. You may need to start all over again.*
3. *Paired devices remain paired even when:*
   - *One of the devices is not turned on.*
   - *A service connection is interrupted or the service stopped.*
   - *One or both devices are rebooted.*

CONNECTION

In some cases the Blue Twin can be disconnected from your phone and you will need to restore the connection.

- If the Blue Twin has been switched off: Switch on the power and press the MF-button (3) for 3 seconds until the purple indicator starts to flash.
- If the mobile phone has been switched off: Turn on the mobile phone and restore the connection via the phone's menu.
- If one of the two devices has been out of range: Make sure that both devices are back within working range.

Note:

For all mobile phone types, it is recommended to set "Trust" or "Authorized" for Blue Twin in the Bluetooth® menu of your mobile phone. Please refer to the manual of your mobile phone for more detailed information.

DISCONNECTION

You can disconnect the headset from your phone when, for example, you want to use another Bluetooth® device with your phone. The Blue Twin can be disconnected in the following ways:

1. Switch off the headset.
2. Disconnect the headset in the phone's menu.
3. Move the phone more than 10 meters away from the headset.

WEARING THE HEADSET

The Blue Twin is designed to be comfortably worn in 2 ways.

Option 1: wearing the headset on the ear (see ILLUSTRATION II)
You can wear the Blue Twin on your ear, by attaching the ear plug (1) to the headset. Now place the Blue Twin on your ear. You can also use the ear hook to find the most comfortable fit for your ear.

Option 2: wearing the headset on your clothes (see ILLUSTRATION III)
Attach the clothing clip (9) to a piece of clothing as shown in ILLUSTRATION III. Make sure that the microphone (11) is directed towards your mouth. Now place the speaker (10) in your ear, so that you can start making phone calls. As soon as you finished making phone calls, you can also easily clip the speaker to a piece of clothing.

MAKING AND ANSWERING / ENDING CALLS

Once the Blue Twin headset is successfully paired with your mobile phone, you can use it to make and receive calls. The Blue Twin headset can be used with voice dialing if your mobile phone supports this feature. (Please check the manual of your mobile phone).

MAKING CALLS

Using voice dialing:
Press the MF-button (3), wait for a beep and say the name of the person you want to call. → Press the MF-button (3) again to cancel voice dialing.

Using the phone keys to make a call:
Enter and dial the number on the mobile phone as you normally do. → Once the call has been set up, the sound will be transmitted to your headset automatically.

Redial:
Press and hold the MF-button (3) until you hear a beep (app. 2 sec.) to redial the last number you called.

ANSWERING / ENDING CALLS

When the Blue Twin headset is turned on and there is an incoming call, you will hear a musical tone. → Press the MF-button (3) to answer the call or press and hold the MF-button (3) for 3 seconds to reject the call. → Adjust the headset volume by pressing the + button (2) to increase the volume and pressing the - button (8) to decrease the volume. → End the call by pressing the MF-button (3).

When the headset is turned off, press and hold the MF-button (3) for 5 seconds to turn the headset on. → Then press the MF-button (3) again to answer the call.

Note:
Due to the different design of some mobile phones, an auto-disconnect may happen even when the Blue Twin headset is turned on. In that case, the headset won't ring when there is an incoming call. Press the MF-button (3) for 1 sec. to reconnect the headset with your mobile phone for an incoming call.

MUTE FUNCTION

During conversation, it is possible to mute the microphone.
Press and hold the Volume-button (8) until you hear a beep to activate the Mute function. → To disable the Mute function, press the Volume-button (8) again until you hear a beep.

TRANSFERRING / SWITCHING CALLS

To transfer a call:

Press and hold the MF-button (3) until you hear a beep to transfer the call to the mobile phone while talking on the headset. The headset will be turned off. → If you want to transfer the call back to the headset, press the MF-button (3) again for 5 seconds.

To switch to a second call:

Press and hold the MF-button (3) for 3 seconds to switch to a second call during a call. This function only works when your mobile phone service provider provides this service (check with your network provider).

CONNECTING WITH A PC OR PDA

You are allowed to connect the Blue Twin headset with a Bluetooth® enabled PC or PDA that is supported with headset and/or handsfree profiles. Please refer to the user manual of your Bluetooth® enabled PC or PDA for setup information.

TROUBLE SHOOTING

1. There is no red indication while charging the battery (even if the Blue Twin headset is connected to the charger).	• For first time use, it could be that the battery capacity is too low. It could take some time accordingly before the red indicator lights up. • When the headset has not been used for some time or when the battery of the headset is empty, it could also take some time before the red indicator lights up.
2. No sound contact between the Blue Twin headset and other devices.	• Make sure that the two devices have been paired. • Make sure that the headset is turned on. • Make sure that the two devices are within a working range (10 m). • Make sure that your mobile phone is within signal strength. • Some Bluetooth® mobile phones can support only one Bluetooth® headset. Disconnection may happen when there is more than one headset paired with your mobile phone.

3. Several Bluetooth® devices appear on my mobile phone while searching the Blue Twin headset.	Most Bluetooth® enabled mobile phones with Bluetooth® function activated can search for more than one Bluetooth® device within operative range. The headset will appear as “Blue Twin” on your mobile phone after having been found by your mobile phone.
4. There is a disturbance noise coming from the Blue Twin headset.	The performance of the headset will be affected by two factors: • Whether your mobile phone is in a good signal area. If your mobile phone is in weak signal area, you won’t hear clearly with the headset. • Whether it is in the operative range (10 m). The headset will automatically try to reconnect within 90 seconds (this depends on your mobile phone).
